To: BONNIE LAVELLE
Fax: (303) 312-6897
Date: October 6, 1999
Subject: Data Sheet for Gardens
Pages: 3

The data sheet presented in the SOP does not accommodate the following documentation requirements:

- Paired soil and vegetable sample IDs
- Sample Times
- Vegetable Type by Sample ID
- Comments/Notes

The attached revised sheets will allow us to readily record and enter this information. I discussed this with Doug yesterday. The database currently prompts for entry of the vegetable type, and he will add a field for paired soil sample ID. Please call me this afternoon if possible with any comments on the data sheet.
